

Welcome

at

A Living Community

divided over tree locations in a sweet valley in
the middle of the Forest at the border of
Zutendaal.

Here we try to live as much as possible off-grid
using as less as possible electrical stuff and live in
Harmony with Mother Nature. We eat as much as
possible food from our own perma-culture
gardens and from the surrounding area.
Sometimes we help at a local biological farmer.
And we actively recycle.

Also there is the piece of land called "de Wei".
Here the permaculture school creates new gardens
and teaches about perma-culture to people who
want to learn more about it, all on donation base.
What you learn depends on the time of year, the
season and the weather.

PERMACULTURE SCHOOL

(Kristoff Goossens)

What is the Spirit of the group.

We are a group of friends living close as a family.

*We are all creative and have a big heart for
Nature and Spirituality.*

Being Aware is what's on our mind.

*We live as much as possible in tune with Spirit
and the natural time .*

*We want to Be an example in these new times ;
the New Way of Living, together with in Nature.*

*Decisions are made in consensus in the inner
(talking) circle where every body is equal in their
sayings.*

It happens regularly that there is meditation, massage or yoga. Also we sing a lot and make music. In the evening we like to sit in a circle around the fire.

There is also the opportunity to organise a weekend or week with play-or work shops, a sweat-lodge or education about spirituality , nature or self-sustainable living.

We have a free donation pot, to cover expenses like the rent, water, gas, electricity, reparations and the basic foods.

You can support us in many ways. Just contact us and let us know what your skills and possibilities are.

From spring till fall there is also the possibility for people that want to help in the gardens to stay with us (in there own tent).

We can have short time guests that come for example for a couple of days (mostly friends visiting) or guests that stay for a longer period.

From longer term guests we expect that they participate in running the household. Which is not so much in the house, but mostly outside.

For example

- getting wood and cutting wood is always necessary to create a wood-stock (already for the winter also)
- daily cooking
- helping working in the garden
- the regular cleaning and keeping things tidy
- helping with one of the projects (such as creating a loam oven, creating a communal place, building a sauna and that kind of stuff)

- participating at the permaculture school

This is a place where you can let go of all the stress of society and become 1 with your inner peace/silence, with (your true) Nature.

Where you can recharge your self to the silence, the love, the joy and the positive vibes here (as long as it does not "costs" us too much energy).

A space to awaken, grow, flow, learn, teach others, connect with (like minded) others, Nature and your Self, to come 2 gather in Love, Light, Peace, Harmony, Respect, Happiness, Joy and Freedom.

Where there is inner-awareness of truth and trust so every one can work and play from their own creativity / energy.

Feel yourself at Home.

Treat the place as your home,
would be highly appreciated.

You can stay as long as you like & we like.

Please Respect it if we point out that the place
(or we) need a bit of peace and quiet. Just go with
the Flow and Feel.

Stay tuned.

Love ,
the Lovely Light-workers
(the communal working groups)
of 't Soete Dael .

Let the Dream became the Magical Reality.

Don't forget ; This is also a playground for every
child, also the 1 inside U .
